INTRODUCTION AND CORPORATE OVERVIEW

Line Fountain Company Limited is an indigenous oil & gas services company, incorporated in Nigeria on 7th day of June, 2016 for the sole purpose of rendering Lifting Inspection, NDT, Engineering Constructions / Electrical Engineering, Fabrication, Procurement and Logistics services to operators in the oil & gas industry.

Our dream has always been to carve a niche for ourselves by offering Industry Best Practices. If we have succeeded thus far, it is because all of us at **Linefountain** share this **DREAM**.

Linefountain Company Limited is highly experienced in the Lifting inspection, NDT, Electrical, Earth moving equipment and Storage facility aspect of the Oil and Gas Industry both in Nigeria and beyond with comparative advantage in Pipeline, Flowline and Facilities Construction in both land and swamp, construction and rehabilitation of storage tanks. We also undertake Procurement and Logistic services.

In our bid to render the best of services, we recently signed a Technical Partnership Agreement with Piaf Global resources ; Acme Heights Ltd a seasoned Nigerian company that have operated in the Oil and Gas industry for well over a decade with proven track records. The founders and key operators of this company are committed Nigerian professionals who have distinguished themselves in their areas of professional calling, building on a solid foundation; made up of a strong and dynamic board of directors, an efficient management team and a result-oriented workforce that is made up of both local and expatriate staff. All these professionals work collectively to achieve set goals and targets and are also committed to excellence. These highly qualified and experienced persons are dedicated to render quality services to our clients at all times.

Linefountain Company Limited is particularly aware of and committed to focus on Health, Safety and Environmental Protection in accordance with international practice.

Based on the subsisting Understanding with our Partners, our reputation is based on our capacity to plan, design, construct inspect and maintain a variety of engineering projects to the satisfaction of our client. It is also based on our ability to mobilize and start any kind of project in Nigeria in a

record time supported by the commitment and strength of our personnel and a mutually beneficial relationship compelled-support from our Bankers.

The Total Quality Management system (TQMs) is a permanent feature of the life of the company and all personnel, being aware of their responsibility, shall maintain and act in line with the policy and the derivative quality documented system throughout all levels of the services.

The company endeavors to secure the relation to all stakeholders involved in business, including the general public and the protection of the environment.

With the **Linefountain Company Limited** team concepts, we offer our customers a performance spectrum consisting of building blocks which cover all the project related tasks from the projection of the planning and execution up to the smooth start up of operations. The results obtained so far are very encouraging as our clients and other observers attest to our second-to-none quality performance and timely delivery status in the industry.

Linefountain Company Limited has her corporate headquarters strategically located in Port Harcourt.

TOTAL QUALITY MANAGEMENT AND CONTINUOUS IMPROVEMENT

A key member in **Linefountain Company Limited** project team is the Quality Assurance Manager. This individual is knowledgeable about ISO-9001 requirements. He will regularly review and audit all activities and procedures, with respect to Project Execution and quality Assurance Manual, and report successes and failures to the company Management team.

The Quality Assurance Manager shall ensure that quality is being measured and the client feedback is being received, recorded and acted upon. This will result in continuous improvement of **Linefountain Company Limited** people, procedures, construction standards and productivity.

VENDOR INDEPENDENT SOLUTIONS

Linefountain Company Limited is vendor-independent. This means that we can objectively execute projects using state of the art technology including materials and equipment all engineered and manufactured to meet the exact needs of the client.

In summary, the combination of our engineering and technical skills, our operations, experiences, productivity and quality assurance philosophies will ensure that **Linefountain Company Limited** shall deliver projects on schedule, effective to meet operations requirements and **CLIENT** will have the best return on investment.

Yours truly

Lawrence Peters

Chief Executive Officer (CEO)

CORPORATE PRINCIPLES

ECONOMIC SUCCESS

In responsibility to our stakeholders, it is our prime objective to ensure economic success on a long-term basis. Targeted activities, early identification of chances and risks and their responsible consideration safeguard the continuity of our company and protect our shareholders' interests. Owing to systematic and continual improvement, we will be able to meet the challenges of the future.

CUSTOMERS

Our activities are focused on satisfying our customers' warranted requirements and expectations. We meet market demands through professionalism, innovative ideas, competitive pricing and with close contacts with our customers. As part of our strategies and objectives, we openly communicate information and experiences to our customers. We warrant the required confidentiality and discretion.

EMPLOYEES

In order to meet our objectives, we put emphasis on efficient and competent employees. We promote the Company's knowledge by professional development and training, support personal development of our employees and provide adequate information and suitable working conditions. Our employees actively inform themselves. They match their personal interests with the Company's objectives and regard the Company's objectives as priority. Health and safety of our employees and all other parties to our activities are among our main concerns.

SUPPLIERS AND SUBCONTRACTORS

For the purpose of quality and profitability of our services, we also count on the experience and capacity of well-selected suppliers and subcontractors.

ENVIRONMENT

We respect the human rights and promote common welfare. We observe the existing laws and recognize the rules of fair competition. We are aware of our environmental responsibility. While performing our supplies and services, we strive for economic handling of energy and natural resources and reduction of noxious emissions and waste.

OUR VISION

LINEFOUNTAIN COMPANY LTD. aims to be a leading Nigeria Company providing **ENGINEERING SERVICES – QUALITY CONTROL ENGINEERING SERVICES, INSPECTION AND TESTING (NDT) AND CONSULTANCY SERVICES** to Federal and State Government, the Nigerian Oil and Gas, Construction, Manufacturing and Petro-Allied Industries with an enviable tract record.

MISSION STATEMENT

To maximize the use of local professionals with the aid of current technologies in line with industry best practices to deliver quality services to our customers under safe environment.

KEYS TO A SUCCESSFUL JOB EXECUTION

PLANNING / BUDGETING

When awarded a contract, our first priority is to assemble all key / discipline personnel required for the project to draw up a budget tied to a work schedule for every phase of the project in view of the project completion date.

PERSONNEL

Our experienced Construction Manager, Project Manager, Engineers and Supervisors have the know-how to lead our crews both onshore, swamp and offshore in all kinds of working condition.

EQUIPMENT

Our seasoned labor force uses machinery and equipment that are in excellent working condition.

LOGISTICS SUPPORT

The immediate needs of working at our various locations and sites are given quickest attention through the means of a 24-hour on-call system.

SAFETY

A full-time safety manager co-ordinates **Linefountain Company Limited** entire safety program. His leadership in training the work force creates a safety consciousness that is carried into the workplace. He carries out pre-job safety planning meetings, morning pep talk, and continuous enforcement of wearing of safety gears, reporting, investigating and follow-up of accident reports. He conducts regular, unscheduled site inspection to keep safety in the forefront. He also teaches hazard communication.

ORGANIZATIONAL STRUCTURE

GENERAL

The Organization is described in the organization chart (see attachment) indicated titles, authority and reporting relationships. Specific duties and responsibilities are contained in job descriptions (below). The Organizational freedom is sufficient to identify quality problems, initiate or recommend solutions, and verify implementation of corrective measures.

ACCOUNTABILITY / RESPONSIBILITY

The accountability of all the activity is assigned to the Project Managers & Engineers who are located at the job site. They are fully responsible for supervising the organization and to ensure that proper control, inspection and documentation are performed. They are responsible for establishing a satisfactory working relationship with client representatives. Reporting relationships will be as shown in attached organization chart.

The prime responsibility for performing quality work- in all discipline rests with the Superintendents, Foreman and Project Engineers etc., actually supervising the performance of the work. The project engineer and Superintendent are jointly charged with the responsibility for compliance with all plans, specifications, applicable codes and standards in inspection practices.

All personnel will perform their duties with job safety in mind and shall report and, if necessary, stop all unsafe practices.

SCOPE OF SERVICES

1. Piling /Shore Protection Activities, Pile Driving

- . Pile Extraction
- . Drilled Shaft/bored pile
- . Foundation piling
- . Shore Protection piling

2. Civil Construction

- . Civil Construction Design, Building and Renovation of Existing Structures, Shoreline Protection Structures, Bond Walls, Steel and Timber Structural works, Jetty Construction, Drainage and Landscaping Works etc.
- . Civil Engineering Project Feasibility and Development studies.

3. Production Operations

- . Flow station and well head operations
- . Greasing of well head and process valves
- . Flowline and pipeline leak repair
- . Well head upgrade
- . Manifold inspection and maintenance
- . Maintenance of diesel and natural gas powered generators

4. Engineering & Maintenance Services

- . Land/Swamp Flowline/pipelines construction and Leak repair
- . Construction of steel structures, steel storage tanks and vessels
- . Cathodic protection design, construction, installation and maintenance
- . Plant turn-around maintenance
- . Repair and maintenance of onshore/swamp pipelines of all sizes

5. Asset Integrity Management

- . Pipeline pigging operations
- . Pressure Testing/Commissioning
- . Pressure Vessel Cleaning, Inspection and Repairs
- . Corrosion Cleaning (Grit Blasting) and Painting
- . Utility Systems

6. Project Management/Consultancy Services.

- . Project planning, management and support.
- . Project Control
- . Material Control
- . Inspection
- . Construction Management
- . Procurement expediting services

7. Field Services

- . Vendor Inspection
- . As-built drawing and Inspection
- . Materials handling
- . Right-Of-Way and Site Acquisition and Damage Settlements
- . Permits - Federal, State, City and Foreign Utility Crossings

PROCUREMENT SERVICES

Linefountain Company Limited have the capability to procure and deliver materials and equipment needed in the day-to-day operations of the Oil & Gas industries. Our services involve both local and international sourcing of specific needs of our clients.

WORK SPREADS

Linefountain Company Limited shall provide spreads and crews once a contract has been awarded.

ACCOMMODATION

Suitable camp facilities are provided for our work force, which is in line with the oil & gas industry standard once a contract has been awarded.

a) *Logistics*

All activities pertaining to projects are coordinated from our Head office in Port Harcourt. Below summarized the scope for logistics coverage in our main office and base office.

LIST OF KEY PERSONNEL

	PERSONNEL	DEGREE / DISCIPLINE	YRS
1.	Lawrence N. Peters	HND Mechanical Engr.	19
2.	Nseobot Aniekan J	B.Sc, Env. Protection &Resources Mgt	12
3.	Emmanuel P. Udoh	B.Sc. Electrical Engr.	14
4.	William Idoro	B.Sc, Electrical Engr.	12
5.	Innocent Fred	B.Sc, Mechanical Engr.	15

STATEMENT OF QUALITY.

Linefountain Company Ltd has been committed to providing quality data within client specified guidelines. We are equipped to handle the environmental testing needs of the inspections, engineering, consulting, pipeline and refining industries, as well as governmental agencies. Our entire focus is on Environmental Science, Construction, and Engineering, and its application to the prevention, cleanup and monitoring. Consequently, we have allocated tremendous resources towards the development of more accurate and precise techniques involving Engineering processes. We are constantly striving to improve our services through investments in employee training, automation and instrumentation.

We are very proud of our recent accomplishments and firmly believe all our clients will directly benefit from these improvements. Our facilities and instrumentation with state-of-the-art equipment for environmental, and construction services, enable LFCL to meet all the specified standards, guidelines and regulations with confidence.

I am confident that we can provide unparalleled service to our clients by focusing on innovation and attention to their needs. I would encourage all clients and prospective clients to make a trip to Port Harcourt for a visual inspection of LFCL Facilities. I know you will be impressed with our staff and facilities.

We have an excellent client service department and very knowledgeable project managers to handle all inquiries.

LOCAL CONTENT POLICY.

Our policy is geared towards developing and improving local indigenous capacity building in the Nigerian oil and gas industry with a view to enabling Nigerians take active participation in order to improve the growth and development of the Nigerian economy.

Linefountain's Local Content Policy is to recruit suitably qualified Nigerians with emphasis on the Niger Delta Region in all operations where requisite resources are available locally without compromise to quality, technical integrity and operational effectiveness. The entire work force presently consists of 100% Nigerians.

Linefountain company Ltd policy statement for local content Implementation is;

1. To establish optimum degree of Nigerian content without compromising its objectives of operational effectiveness.
2. To Train inspectors, maintenance supervisors, managers and other staff during execution of projects, so that future projects could attain higher levels of Nigerians participation & improvement.
3. To expose our staff to new technologies through on the job or overseas training to be applied in the oil and gas industry.

4. Ensure that expatriate technical partners are disposed to working harmoniously with locals and sub-contractors through cultural education initiatives to embrace transfer of technology and to reap all rewards that mutual understanding and respect bestow.

Linefountain company Ltd. focuses on training the work force as a trained worker is an invaluable asset; hence employees are encouraged to take full advantage of this gesture to developing and improving on their knowledge and safety awareness. The level of training depends on the type of task and level of supervision required. This is aimed at acquainting the worker with the work processes, necessary skills and behavioral attitude requirement.

ENVIRONMENTAL MANAGEMENT POLICY.

Linefountain company Ltd is committed to providing quality engineering consulting services to our valued clients. We will strive to be exemplary leaders in the engineering consulting and services field by the application of environmentally responsible solutions and technologies, and by conducting our own business in accord with high standards of environmental responsibility. Specifically:

- ❖ We will, in the conduct of our work, comply with all applicable federal, state or local government applicable environmental laws, regulations, guidelines and codes of good practices.
- ❖ We will employ and use qualified and properly trained professionals and technical staff for the conduct of our work.
- ❖ We will ensure use of both established and innovative engineering management techniques and approaches.
- ❖ We will consider the environmental impacts of our actions, facilities and operations and will seek to minimize them.
- ❖ We will support awareness of environmental factors and impacts by the professional growth of our staff through training and educational programs.
- ❖ We will implement a quality management program for all environmental, health and safety aspects of our work.
- ❖ We will review, evaluate and manage work-related risks to the environment and to human health for both our employees and client.
- ❖ We will report annually to the Chief Executive Officer and Board of Directors, who will assess our performance with regard to these environmental policies.

HEALTH, SAFETY AND ENVIRONMENT (HSE) POLICY.

Linefountain Company Ltd is committed to the protection of the health and safety of our employees, the public and general environment of the work place. We believe that incidents and injuries are preventable, and that a job is only done if performed safely.

Our goals are to:

- ❖ Prevent workplace incidents, and injuries
- ❖ Continually improve our health, safety and environmental performance.

- ❖ Foster a culture in which all employees, partners, contractors, and sub-consultants share this commitment to health, safety and environmental protection / preservation.
- ❖ Have the best safety performance, as compared to similar companies.
- ❖ Make safe conduct a condition of employment
- ❖ Always comply with health and safety legislation and guidelines
- ❖ Operate under a documented health and safety management system through representation on joint health and safety committees.
- ❖ Review our health and safety performance regularly, evaluate performance information, and communicate performance to all employees.
- ❖ Ensure that our health and safety management system remains relevant.

Lawrence Peters
Chairman / Managing Director

QA / QC POLICY.

Linefountain Company Limited is committed to providing exceptional services to our clients. We believe that quality is a basic business principle, and that quality management is an integral part of every project.

Our goals are to:

- ❖ Recognizing the high quality demand of environmental data & Interpretations and provide means of assuring quality at all times.
- ❖ Provide all required resources and training to meet our quality commitments.
- ❖ Apply the best available practices & technologies in consonance with national and international standards in order to meet our client requirements.
- ❖ Strive at all times to satisfy our clients & exceed their expectations.
- ❖ Take a systematic approach to quality management that is designed to achieve continual process improvement.
- ❖ Involve employees at all levels of the organization in quality management.
- ❖ Foster a culture in which all employees share this commitment
